1 GETTING STARTED

1. GOAL

① Game Overview

This is a war-simulation game which pits two powerful enemies against each other in modern warfare. The player is in command of the movement, battle operations, and supply of all his units. During battle, if the NORMAL mode has been selected, the player assumes personal control over the action.

② Victory And Defeat

Your goal is to bring the enemy under your control, and ultimately to conquer all of his territory. In one-player mode there are 16 maps to choose from. In two-player mode there are 15 maps. Victory is achieved with the defeat of the enemy commander's unit.

NOTE : The commander's unit, a tank unit, is indicated by an "H".

2. CONTROLLER PARTS

Game control is as follows.

- Control pad : Selection, cursor movement
A button : Make choice, activate
B button : Stop action, cancel
START button : Unit function indicated
SELECT button : Battle mode selected

3. START UP

① Selection of Mode & Number of Battle Units

Pushing the START button on the Title Screen will bring up four selections, 1 Player, 2 Players, 3 Units and All Units.

<u>1 Players</u>	BLUE = Player, RED = Computer
<u>2 Players</u>	BLUE = Player 1, RED = Player 2
<u>3 Units</u>	3 units can be moved at once
<u>All Units</u>	All units can moved at once

NOTE: All-Units mode is more difficult. Three-unit mode is recommended for beginners.

② Level of Difficulty (FAME POINT)

Selecting 1-Player mode the level of difficulty appear on the screen. If the level is high, FAME POINT (FP) will be necessarily lower.

NOTE: FP is important in the production of new arms. If your FP is high, you can produce several different types of units. If your units occupy a town or an airport; or win a battle, you gain FP.

③ Map Selection

Any map from 1 to 15 may be selected. However, map 16 is reserved for 1-Player mode. Upon winning a battle in each of the fifteen maps, you receive an important password which later must be input before entering map sixteen.

In map 16 there are three levels of difficulty. In order to play on this map, however, you must have first secured all previous passwords from map 1 through map 15.

Note that, although proper passwords may have been used, you cannot change levels upon entering a new map. For example, if you have used level one from map 1 to map 10, you cannot change to level two from map 11 through 15.

GAME PLAY

1. MOVEMENT

① Selecting Units To Go Into Action

The Control Pad will allow you to move the cursor to your selection. Pressing A button will make your selection (DECISION). Press the B button twice to exit this screen.

② Production

Moving your cursor to the picture of the factory brings up the Production Screen. (See 11th page)

Use the Control Pad to move the cursor to the unit that you wish to produce.

Use the A button to select (decide) which unit to produce.

NOTE: YOU CANNOT PRODUCE A UNIT AFTER ALL PRESENT UNITS HAVE MOVED. For example, in 3-unit mode you may produce after 1 or 2 units have moved, but not after all 3 have moved.

③ Function of Units

After moving the cursor to the selected unit, pressing the START button will display the function of that unit. Pressing the START button once more will bring you back to the original screen.

③ Unit Movement

Bringing your cursor to the word MOVE, then pressing the A button will initiate a unit move. The Control Pad sets the direction. The A button will execute the move.

NOTE: To cancel a move you must first direct the cursor to the word MOVE in the Command Window. Then press the B button to change the window to the YES NO options. Finally, move the cursor to the word NO and press the A button.

2. PRODUCTION

Moving your cursor to the picture of the factory brings up the Production Screen. The units indicated on the screen will be those that you can presently produce. How many units you can produce depends on your FP. There are two basic types of units to produce, those for air combat and those confined to ground warfare. You can select only one type per turn (that is, only one unit production is possible until all units have been moved).

NOTE: If you manage to destroy the command unit guarding the factory, the factory itself will disappear.

3. BATTLE

When an enemy unit is adjacent to your unit, you can engage the enemy in battle. Pressing the Control pad determines which adjacent enemy unit will be engaged. Pressing the A button twice begins the battle.

② Battle Mode

There are two types battle possible, NORMAL and AUTO.

<NORMAL>

In this mode you can react to each incident as it occurs. In other words, you will be able to direct return fire against an attacking enemy. You will also be able to give appropriate commands in response to what is indicated in the Message Window.

<AUTO>

In this mode all action is determined by the computer. Pressing the SELECT button during a battle will allow you to switch modes. Pressing the Control Pad will move the cursor to your choice of mode. Pressing the A button after this will put you into your selected mode.

NOTE: The mode and the scroll speed of the Message Window can change only once per battle scene.

③ Commands (IN NORMAL Mode)

Commands available during battle are as follows.

<ACTION>

- ATT Attack. → Changes to Weapon Select Window.
- DEF Defense. → Changes to Defense Select Window.
- RET Retreat. → Allows defensive actions and, at times, a retreat.

<WEAPON SELECT COMMANDS>

Some units give you a weapons option. Your choices are limited to two per unit. The normal choice is standard equipment, for which there is no ammo limit. The second choice is for special equipment. There is a limit on ammo for special weapons. The special weapons have more fire power and better accuracy than the normal weapons. Of course, the use of some special weapons may be inappropriate depending on the type of enemy that you encounter.

<DEFENSE COMMANDS>

You should use appropriate defensive maneuvers against enemy attack. There are a variety of maneuvers that you can select. There are usually six basic maneuvers.

MANEUVER 1	MANEUVER 2	MANEUVER 3
MANEUVER 4	MANEUVER 5	MANEUVER 6

- | | | |
|--|---|---|
| MANEUVER 1
Chances of avoiding enemy fire are not so high. But this can set up a good counter attack. | MANEUVER 2
Chances of avoiding enemy fire are high against normal equipment. | MANEUVER 3
Chances of avoiding enemy fire are high against special equipment. |
| MANEUVER 4
Chances of avoiding enemy fire are high against both normal and special equipment. But you cannot counter-attack. | MANEUVER 5
Chances of avoiding enemy fire are high. You can also counter-attack easily. | MANEUVER 6
Locates enemy and evaluates the situation. |

NOTE: At times maneuver 5 is not available.

4. SUPPLIES

A unit's fuel and ammunition can be re-supplied. There are two methods of supply. One is to use supply vehicles or cargo aircraft. A second method is to move your unit to a town or airport where you can use special supply commands. Although both methods will allow you to completely refuel and stock up on ammo, only a stop at a town or airport will allow you to re-supply a unit that requires equipment repairs.

3

MAPS AND CHARACTERISTICS

The maps are organized into hexagons. These hexagons can be mountains, woods, sea, towns, or airports. The terrain in each hexagon has a direct effect on maneuverability and the extent to which you can take evasive action.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient the receiving antenna
- Relocate the NES with respect to the receiver
- Move the NES away from the receiver
- Plug the NES into a different outlet so that computer and receiver are on different circuits.
